

FABco Shims

FABco produces metal shims for the Industrial, Petro-Chemical, Commercial, and Residential industries.

In order to be competitive, FABco begins with a 4' x 8' metal sheet and then fabricates down to 4"x4" and 3"x5" dimensions. As with all our products, the customer comes first and FABco can create any size you need.

FABco metal shims are manufactured from A36 material in 1/8", 3/16", and 1/4" sizes.

Please feel free to contact us with any questions, comments, or concerns. We pride ourselves in being flexible to accommodate any of our customers needs in a timely and economically competitive manner.

Provided with all of our products is material certification and test reports.
